Full Stack Engineer / Frontend Developer Profile

Dynamic and results-driven Software Engineer with over three years of hands-on experience architecting and optimizing modern web applications for scalability, performance, and user experience. Proven expertise in frontend frameworks like Vue.js and Nuxt.js, backend technologies including Node.js and Java Spring Boot, and cloud platforms such as AWS. Adept at upgrading legacy systems, crafting Proofs of Concept, and building reusable tools like geolocation libraries in Strapi. Demonstrated strengths in problem-solving, code maintainability, and technical mentorship, with a strong grasp of design principles and best practices such as S.O.L.I.D and unit testing. Recognized for hands-on collaboration through pair programming and for delivering production-ready solutions with precision.

Areas of Expertise

- Frontend Architecture
- Full Stack Development
- RESTful API Integration
- Git-Based Version Control
- Scalable Web Application Engineering
- Problem Solving & Critical Thinking
- Peer Programming & Code Reviews
- Task Delegation (non-managerial)
- Developer Training & Mentorship
- Git-Based Version Control
- Technical Communication
- Agile Collaboration

Technical Proficiencies

Frontend Development:	Nuxt.js, Vue.js, TypeScript
Backend Development:	Full Stack Development, RESTful APIs, MongoDB
Cloud & DevOps:	AWS, Git
Testing & Quality Assurance:	Unit Testing
Software Architecture & Design:	S.O.L.I.D Principles, Software Design Principles

Key Career Highlights

- Successfully migrated legacy frontend codebases aimed at enhancing maintainability and scalability of applications.
- Developed and presented Proofs of Concept to validate new features and guide technical decisions.
- Facilitated technical workshops and mentored junior developers, contributing to collaborative and growth-oriented team culture.
- Delivered performance and UX improvements to e-commerce platforms by leveraging modern web technologies, such as Nuxt.js, TypeScript, and AWS serverless architecture.
- Brought strong organizational and communication skills from prior experience in financial advising and customer service, while enhancing cross-functional collaboration and stakeholder engagement.

Professional Experience

VeryChic – Barcelona, Catalonia, Spain **Apr 2022 — Present**
Software Engineer

Developed and maintained full-stack features for an e-commerce platform using Nuxt.js, TypeScript, and AWS serverless services to improve scalability and performance. Collaborated cross-functionally with product, design, and backend teams to prototype and validate new features through Proofs of Concept (POCs). Ensured code quality through the implementation of unit testing, adherence to S.O.L.I.D principles, and active participation in peer code reviews.

Selected Accomplishments:

- Spearheaded performance and UX improvements for a high-traffic e-commerce platform by modernizing the technology stack, enhancing frontend efficiency, and elevating user engagement.
- Developed a custom geolocation library for Strapi to define hotel regions, enabling efficient location-based data management for internal back-office operations.

- Led modernization efforts while upgrading legacy frameworks and implementing scalable solutions aligned with web standards.
- Directed successful migration from Vue 2 to Vue 3 using Nuxt.js while enhancing code maintainability and long-term scalability. Facilitated internal workshops and training sessions while strengthening team capabilities and promoting continuous learning.
- Applied robust and modern tech stack, including AWS, Java Spring Boot, and advanced frontend tools, to deliver robust solutions.
- Boosted platform scalability and performance through proactive maintenance and targeted system enhancements.
- Developed and delivered Proofs of Concept to validate innovative features and third-party integrations.

ISDI Coders – Barcelona **Jan 2022 — Jan 2022**
Full-stack Developer

Built and deployed full-stack web applications using JavaScript, Node.js, Express, and MongoDB, while following agile development practices. Collaborated with peers in code reviews and pair programming to reinforce clean code practices and improve team velocity. Developed responsive frontends with HTML, CSS, and modern JavaScript frameworks to ensure cross-device usability.

Selected Accomplishments:

- Designed and developed first full-stack web application and implemented end-to-end features across frontend and backend.
- Built scalable web applications using modern technologies, focusing on performance, usability, and maintainability.
- Designed responsive user interfaces with React, managed state with Redux, and integrated RESTful APIs with MongoDB backend.
- Gained proficiency in advanced JavaScript frameworks including Next.js, TypeScript, and Node.js.
- Applied software engineering best practices, such as S.O.L.I.D principles, and ensured code quality through unit testing with Jest.
- Improved application performance by conducting thorough code reviews and implementing strategic refactoring.
- Mentored junior developers, fostering team growth, knowledge sharing, and collaboration.

Education & Credentials

Full-Stack Web Development Bootcamp – Desarrollo de Aplicaciones Web
ISDI Coders, Barcelona | Jan 2021 – Jan 2022

Desarrollo de Aplicaciones Web
Institut Obert de Catalunya (IOC) | Jan 2020 – Jan 2023

Sistemas Microinformáticos y Redes
IES Nicolau Copernic | Jan 2012 – Jan 2015

Volunteer Experience

Missionary & Financial Secretary | Sep 2013 – Sep 2015
The Church of Jesus Christ of Latter-day Saints

- Provided personal support to individuals facing challenges such as addiction, family issues, and academic difficulties.
- Managed administrative and financial duties, including budgeting, payroll processing, reimbursements, and conducting audits.
- Developed strong interpersonal, organizational, and problem-solving skills in a cross-cultural environment.

Languages

- Spanish
- Catalan
- English
